--------	----------	------	--------------------------	----------------------

All samples were received in good condition, properly preserved, and properly labeled. All analyses were completed within holding times. There were no relevant protocol specific QC and/or performance standard non-conformances to report with the following exceptions:

The RSK175 recoveries in the matrix spike (-96%) and matrix spike duplicate (-99%) are outside QC limits (46-142%) due to sample matrix interference. See blank spike.
